Crab Apples

All the crab apples we offer are large size, as large as a small sized apple.

SAPA. Ripens very early. Flesh red, skin blue or black when ripe. Heavy bearer.

Standard Cherries

(Kirshen)

The original tree has not blighted once in over 25 years and young trees, even though inoculated, resisted the disease. Entirely hardy in the Northwest sections and Canadian points and is being listed and featured by leading nurserymen everywhere. Fruit is larger than the Bartlett and of A No. 1 quality. Ornamental and Shade Trees

Chinese Elm

Ask for Special Circular on This Tree

The most remarkable, talked of tree of the Century. Hardy, very fast growing, disease free, adaptable to all soils and climatic conditions, it is likewise drouth proof and will thrive where other trees fail to live. In China, where it originated, it grows successfully in high altitudes along irrigation ditches and even at 4,500 feet attains a good height. The tree is similar to our American Elm but grows three to four times as fast, is more upright and graceful and makes an equally attractive tree whether planted on the street or boulevard or whether used for grove plantings, windbreaks or hedges. Can be trimmed to any height hedge wanted. We have probably one of the largest blocks of these trees in the Northwest, grown from seed here which was selected and hand-picked from specially fine specimens. We offer a complete variety of grades from 1 yr. seedlings to two-inch caliber trees, 10 to 14 ft. high.

Many thanks for your promptness.

Yours respectfully,

Mrs. Bruce Campbell.

Dear Sirs: Please accept my check for \$10 for one wreath which arrived on time and was very fine.

Yours truly,

Chas. Gunderson.
